

## BELOVED GODFRÉ

Water, as you know it, is liquefied electrons; and the water is called the Great Solvent. It can dissolve wood. One drop of water constantly dropping can wear away a mountain of solid stone. So your water is liquefied electrons. And the water can dissolve the solid substance; therefore, it is more powerful in certain activities. The air is gaseous electrons, and the air can make the water evaporate, so it is still more powerful. And the Flame—which is the Source of all in the Great Central Sun—is the Directing Intelligence through the Fire Element that controls all these other outer manifestations.

And yet all the substance that you have in your physical world is but a difference of density, the difference in the condensation of the electrons out of the atmosphere. Now you might ask Me, well, where do the electrons come from? That's

what We speak of as the Universal Light Substance. That is the Radiation from the Sacred Fire which is the Physical Sun and the Great Central Sun which is the Universal Light. The Flame gives off a Radiation of this Light Substance out of which the whole Universe is composed.

Therefore, until you reach into the Activity and have conscious knowledge of the Sacred Fire through your own understanding of your “Mighty I AM Presence” and the use of Its Great Cosmic Command of the “Mighty I AM Presence,” you think that these various manifestations are all separate and are made of difference kinds of substance, when in reality they are different condensations of the one Electronic Substance. That is why when the Mighty Saint Germain told you to use the Statement “ ‘I AM’ the only Presence acting,” because there is only one Intelligence, one Substance, one Energy that can act, all of which acts in different densities. Then you must know that you, as the Fire Being, the Being of the Sacred Fire, the Eternal Flame of the “Mighty I AM Presence”—then you, because you have the Intelligence of that Flame governing the substance of the body, you become the Director or the Controller of the conditions in the physical world.

Not unless you understand this and unless you make conscious effort by Conscious Command to govern conditions in the outer world, or to speak your Fiat into this Universal Light Substance, announcing to that part of Life what you want to use at your point in the Universe—how you want It condensed, whether you want It solid or liquid or gaseous—until you send forth your thought and feeling by your own Conscious Command and Free Will through your own loving Desire or your Desire to have that manifestation, Life ever remains in the formless until you form It through your thought and feeling and spoken word.
